

The Max Planck Institute for Innovation and Competition conducts basic research in law and economics on issues related to the protection of intellectual property, the legal regulation of competitive mechanisms and behavior, and innovation processes from an economic perspective.

The department **Innovation and Entrepreneurship Research** is looking for  
**Student Research Assistants (m/f/d)**  
for at least 6 months, 8 – 10 hours/week

**We offer:**

- Insights into a world-leading research institute with projects in the research fields
  - **Innovation** (e.g. in the context of intellectual property rights, labor and health markets, digital transformation, artificial intelligence, or economics of science)
  - **Entrepreneurship** (e.g. entrepreneurial finance, entrepreneurship education)
  - **Behavioral Foundations** (e.g. incentives for creativity, innovation motives and behavior)
- Flexible working hours (e.g. with regard to exams), partly working remotely
- Compensation as per standard salaries for student research assistants at universities

**We are looking for:**

- Enrolled at a German University or Fachhochschule
- Programs with affinity to economic issues and empirical methods, e.g. Economics, Business Administration, Mathematics, Statistics, Computer Science
- Excellent English communication skills (German is not necessary)
- Independent work attitude, reliability, and detail-oriented
- Knowledge of programming languages (e.g. Python, R, SQL) or research software (e.g. Stata)

**Your responsibilities may include:**

- Data acquisition and maintenance
- Statistical analysis and visualization
- Literature research
- Organizational support

**Interested?**

Please note that you must be enrolled at a German university. Please upload your current certificate of enrolment as proof. Only PDF documents are accepted.

Please apply [online](#)
